

A Stewardess Urges Sunday Observance

by Darren Cole

Dear Friends,

While sitting in an aisle seat on my American Airlines flight, I became keenly aware I was being watched. I was working on a sermon presentation on my laptop when I noticed Edna, the stewardess, peering over my shoulder at what was on my screen. As I turned to Edna, she just kept staring at my screen, obviously in deep thought. Then she said, "***We've got to get back to keeping the Sabbath, don't we.***" A little surprised at her statement I answered, "What do you mean?" She said, "I mean the Christian Sabbath...Sunday." She continued; "We need to stop working and honor it. We need to call our congressmen and get laws to stop work on Sunday." She went on to tell me how the ***appearings of Mary are increasing*** and her messages are saying we ***need to get back to keeping Sunday holy***. Edna was very earnest! After a nice conversation, I recommended a website for her to study more about the true Sabbath.

www.sabbathtruth.com

Time is short. We need to work while times are still favorable. There are honest hearted people like Edna who want to know the truth. My appeal? Support the preaching of the truth before our government tries to silence our voice! My family and I will remain on the front lines preaching the 3 Angels messages as long as we're able!

"Supposing they were doing God service when they were exalting a spurious sabbath that had not "It is written" for it's authority. There must be no delay in getting the special warnings...before the people. I have been shown it (the special warnings) would prevent many from uniting in a petition to Congress to make Sunday observance a law." **1888 872.**
